

Save on Calls Throughout the World

The Yap Jack Plus allows you to make high-quality long distance calls over the Internet at incredibly low rates . . . without a computer.

With the Yap Jack Plus, you can:

- Call any phone in the world at low Net2Phone rates
- Easily connect to start making calls
- Use any standard analog phone to make calls, including cordless

Easy To Get Started

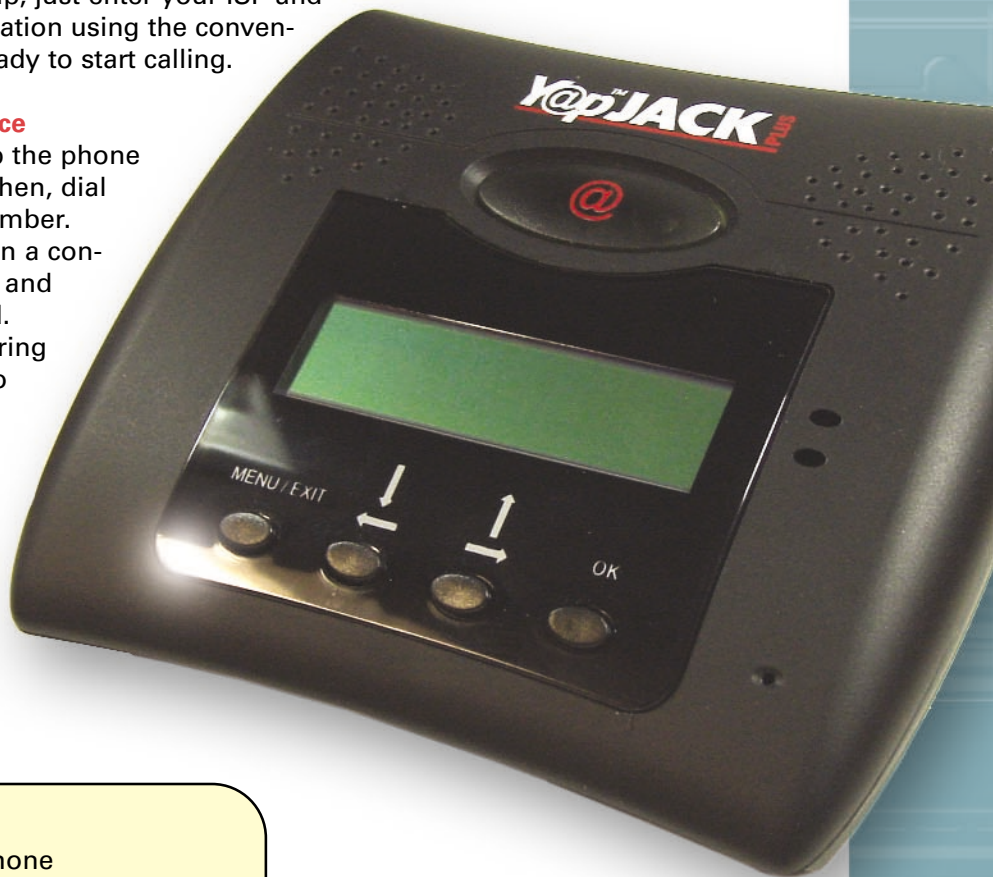

The Yap Jack Plus works with your dial-up ISP and any standard analog telephone. Simply plug your phone into the Yap Jack Plus and connect it to your telephone wall jack. In the initial set-up, just enter your ISP and Net2Phone account information using the convenient LCD. Then, you are ready to start calling.

Improved Calling Experience

To make a call, just pick up the phone and press the @ button. Then, dial the other party's phone number. You will hear a sound when a connection is made to the ISP and then the call will be placed. Simply stay on the line during this quick process – you do not have to hang up and wait for a call-back.

Simple To Call Again and Again

Once your call is finished, you can immediately place more calls without having to connect to the ISP again.

System Requirements

- Any standard analog telephone
- Access to a dial-up Internet Service Provider (ISP) that is PPP (Point-to Point Protocol) compatible
- A telephone line wall jack and local phone company service
